---

## SUMMARY

Frontend-focused Full-Stack Engineer with ~10 years of experience building scalable web applications across cybersecurity, healthcare, EdTech, analytics, and workflow automation. Strong in **React**, **TypeScript**, **Next.js**, **Node.js**, and modern UI architecture, with deep experience in native CSS, CSS preprocessors, and **Tailwind**. Brings hands-on expertise in cloud-native systems and Linux-based environments, and a track record of turning complex distributed workflows into clean, intuitive user experiences.

---

## CORE TECHNICAL SKILLS

React, TypeScript, Next.js, JavaScript (ECMAScript), Node.js, Redux, GraphQL, REST APIs, CSS & preprocessors, Tailwind, PostgreSQL, Docker, Linux/Unix, Git

---

## WORK EXPERIENCE

### Arctic Wolf Networks, Senior Frontend Engineer

Bengaluru, India - Feb 2025 – Present

- Led seamless continuation of projects following BlackBerry's Cylance acquisition, ensuring uninterrupted delivery and system stability.
- Enhanced cybersecurity platform UIs using **React**, **TypeScript**, and **Material UI**, improving scalability and performance.
- Partnered cross-functionally with backend, design, and product teams to establish UI design consistency and architectural standards.

### BlackBerry, Senior Frontend Engineer

Bengaluru, India - Sep 2023 – Feb 2025

- Owned end-to-end frontend architecture for BlackBerry Assistant, an internal AI productivity tool built with **Next.js**, **TailwindCSS**, **AWS Bedrock**, and **PostgreSQL**.
- **Led a 4-member cross-functional team** delivering major UI and infrastructure upgrades across multiple services.
- Modernized a 15-year-old legacy UI stack, reducing complexity and improving responsiveness through **React**, **TypeScript**, and **Material UI**.
- Oversaw CI/CD integration, component library design, and code review practices — improving velocity and maintainability across teams.
- Spearheaded migration of a 5-year-old OnPrem system (Laravel/Django/Docker) to Ubuntu LTS, significantly improving security and uptime.

### Index, Full Stack Engineer

Remote (California, USA) - Sep 2021 – Apr 2023

- Revamped platform architecture by migrating from Ant Design to Radix UI, improving design consistency and performance.
- Delivered reusable React + GraphQL modules (onboarding, billing, settings) accelerating feature delivery cycles.
- Collaborated closely with design and backend teams to ensure API alignment and consistent developer experience.

## Earlier Roles

2015 – 2021 • Full Stack Engineer • **Feathery** | Software Engineer • **Involvio** | Sr. Software Engineer • **Halemind**

Worked on form builders, education, and healthcare platforms using React, Ruby on Rails, and PostgreSQL — delivered features like real-time form editing, Safe Reopen (COVID-19 module), and chat-based dashboards.

---

## Technical Explorations

- [Rick and Morty Characteropedia](#) 📄 - React + TypeScript app using GraphQL API to explore detailed information about Rick and Morty characters.
  - [TrendZ – E-commerce Website](#) 📄 - Fashion E-Commerce web app built with React, Node.js, and GraphQL featuring a modern shopping experience.
  - [Lyrics Finder](#) 📄 - Web app built with React and Node.js that fetches and displays song lyrics using Lyrics.ovh API.
  - [Onscreen Keyboard](#) 📄 - 3D virtual keyboard built with HTML, CSS Grid, and modern JavaScript (ES6).
  - [Breaking Bad Grocery List](#) 📄 - Fun themed grocery list app built with HTML, CSS, and JavaScript.
  - [Algorithm Visualizer](#) 📄 - Interactive tool to visualize sorting and search algorithms using vanilla JavaScript and CSS.
- 

## EDUCATION

Master's Degree in Computer Science - [Siddhartha Institute of Science & Technology](#) (2014 - 2016)

Bachelor's Degree in Computer Science - [SVP CET](#) (2010 - 2014)
