SUMMARY

Frontend focused Full-Stack Engineer with a decade of experience building and scaling modern web platforms across cybersecurity, AI, and SaaS. Expert in React, TypeScript, and Next.js, with a proven record of driving UI modernization, shaping frontend architecture, and mentoring teams to deliver enterprise-grade experiences.

CORE TECHNICAL SKILLS

React, Next.js, TypeScript, GraphQL, Node.js, DynamoDB, PostgreSQL, Docker, AWS, Git

WORK EXPERIENCE

Arctic Wolf Networks, Senior Frontend Engineer

Bengaluru, India - Feb 2025 – Present

- Led seamless continuation of projects following BlackBerry's Cylance acquisition, ensuring uninterrupted delivery and system stability.
- Enhanced cybersecurity platform UIs using React, Next.js, TypeScript, GraphQL, and Tailwind, improving scalability and performance.
- Partnered cross-functionally with backend, design, and product teams to establish UI design consistency and architectural standards.

BlackBerry, Senior Frontend Engineer

Bengaluru, India - Sep 2023 – Feb 2025

- Owned end-to-end frontend architecture for BlackBerry Assistant, an internal AI productivity tool built with Next.js, AWS Bedrock, and PostgreSQL.
- Led a 4-member cross-functional team delivering major UI and infrastructure upgrades across multiple services.
- Modernized a 15-year-old legacy UI stack, reducing complexity and improving responsiveness through React, TypeScript, and Material UI.
- Oversaw CI/CD integration, component library design, and code review practices — improving velocity and maintainability across teams.
- Spearheaded migration of a 5-year-old OnPrem system (Laravel/Django/Docker) to Ubuntu LTS, significantly improving security and uptime.

Index, Full Stack Engineer

Remote (California, USA) - Sep 2021 – Apr 2023

- Revamped platform architecture by migrating from Ant Design to Radix UI, improving design consistency and performance.
- Delivered reusable React + GraphQL modules (onboarding, billing, settings) accelerating feature delivery cycles.
- Collaborated closely with design and backend teams to ensure API alignment and consistent developer experience.

Earlier Roles

2015 – 2021 · Full Stack Engineer · [Feathery](#) | Software Engineer · [Involvio](#) | Sr. Software Engineer · [Halemind](#)

Worked on form builders, education, and healthcare platforms using React, Ruby on Rails, and PostgreSQL — delivered features like real-time form editing, Safe Reopen (COVID-19 module), and chat-based dashboards.

SELECT PROJECTS

- [Rick and Morty Characteropedia](#) 📄 - React + TypeScript app using GraphQL API to explore detailed information about Rick and Morty characters.
 - [TrendZ – E-commerce Website](#) 📄 - Fashion E-Commerce web app built with React, Node.js, and GraphQL featuring a modern shopping experience.
 - [Lyrics Finder](#) 📄 - Web app built with React and Node.js that fetches and displays song lyrics using Lyrics.ovh API.
 - [Onscreen Keyboard](#) 📄 - 3D virtual keyboard built with HTML, CSS Grid, and modern JavaScript (ES6).
 - [Breaking Bad Grocery List](#) 📄 - Fun themed grocery list app built with HTML, CSS, and JavaScript.
 - [Algorithm Visualizer](#) 📄 - Interactive tool to visualize sorting and search algorithms using vanilla JavaScript and CSS.
-

EDUCATION

Master's Degree in Computer Science - [Siddhartha Institute of Science & Technology](#) (2014 - 2016)

Bachelor's Degree in Computer Science - [SVP CET](#) (2010 - 2014)
