

# Himateja Merlapaka

Senior Frontend Engineer / Frontend Lead • React, TypeScript, design systems, frontend modernization

Bengaluru · Remote or Chennai | [contact@himateja.com](mailto:contact@himateja.com) | [himateja.com](https://himateja.com) | [linkedin.com/in/himateja](https://linkedin.com/in/himateja) | [github.com/iamhimateja](https://github.com/iamhimateja)

---

## SUMMARY

Frontend lead with 10 years of experience. I lead frontend engineering, modernize legacy products, build shared frontend platforms, and ship security and AI products. At Arctic Wolf (10,000+ customers) I lead a 5-engineer team, own the endpoint console UI, replaced a 10-year-old jQuery and Kendo UI stack with **React** and **TypeScript**, and built the component library used by 20+ consoles. Shipped an internal AI assistant on AWS Bedrock.

---

## CORE TECHNICAL SKILLS

**Frontend:** React, Next.js, TypeScript, CSS, Sass, Tailwind, Redux Toolkit, React Query, GraphQL, Apollo

**UI and quality:** Material UI, Radix UI, design systems, component libraries, Storybook, accessibility, performance optimization

**Testing and tooling:** Jest, Vitest, Playwright, React Testing Library, Vite, Webpack, CI/CD, Docker, micro frontends

**AI tooling:** LLM integration (AWS Bedrock, Anthropic and OpenAI APIs), agents (Claude Code, MCP), Cursor, GitHub Copilot, evals

**Backend:** Node.js, PostgreSQL, Prisma, Ruby on Rails

---

## WORK EXPERIENCE

**Arctic Wolf Networks** (formerly BlackBerry Cylance, via acquisition), **Senior Frontend Engineer**

Bengaluru, India · Sep 2023 - Present · Joined BlackBerry Sep 2023, moved to Arctic Wolf with the Cylance acquisition in Feb 2025

- Lead a 5-engineer frontend team for the Cylance endpoint console (now **Aurora Endpoint Security**). Own frontend architecture, code review, and delivery across the product.
- Migrated 75% of a 10-year-old jQuery and Kendo UI (.NET) console into a separate **React**, **TypeScript**, and **Material UI** frontend. Now leading the plan to replace the remaining Kendo screens with open source components.
- Owned the frontend of BlackBerry Assistant, an internal AI chat tool (**Next.js**, **Tailwind**, **Radix UI**, AWS Bedrock, PostgreSQL). Shipped in 2025 with a 4-person team. Used daily by managers and analysts across the company.
- Built and led the shared component library and design system adopted across 20+ security consoles and micro frontends, including the main Arctic Wolf dashboard. Established the shared UI primitives, testing, CI/CD, and code review standards for the frontend repos.
- After the acquisition, shipped the Arctic Wolf rebrand of the console, the Devices and Device Policies modules, and the Upsight anti-ransomware integration. Led the frontend upgrade and tech-debt work.

**Index** (now Mora), **Full Stack Engineer**

Remote (San Francisco, USA) · Aug 2021 - May 2023 · Analytics dashboards. React, TypeScript, GraphQL, Node.js, PostgreSQL, Prisma

- Migrated the whole app from Ant Design to **Radix UI**: dashboard, settings, integrations, components, and analytics pages.
- Built onboarding, settings, filters, alerts, invites, and regex syntax highlighting. Integrated **Stripe** payments and invoicing.

**Feathery**, **Full Stack Engineer (Contract)**

Remote (California, USA) · May 2021 - Aug 2021 · Form builder. React, TypeScript, SCSS, Django

- Built Live Edit for the form builder, so users see changes in the form as they make them.

**Involvio** (acquired by Cisco), **Software Engineer**

Bengaluru, India · Jul 2019 - Apr 2021 · Student engagement platform. React, Ruby on Rails, PostgreSQL

- Built the Safe Reopen module (COVID-19 exposure alerts and health passes) that schools used to reopen during the pandemic.
- Cut page load times on the admin tools by **30%**. Built the Sub-Admin Teams feature, a PostgreSQL-based permissions system, and the Ellucian Banner v9 sync for class and student data.

**Halemind**, **Sr. Software Engineer and Associate Product Manager** (intern from Dec 2015, full time from Jun 2016, promoted Jul 2017)

Tirupati, India · Jun 2016 - Jun 2019 · Electronic medical records and hospital management. Ruby on Rails, JavaScript, MySQL

- Led a **9-person** cross-functional team, owning delivery and product scope.
  - Built the Appointment Dashboard, cutting patient wait times by **15 minutes**. Built exam modules for Ophthalmology, Dental Restorative, and Orthodontics that raised test accuracy by **75%**.
  - Built a central chat system for hospital staff (Rails, ActionCable). Redesigned the dashboards for hospitals, doctors, and patients.
- 

## OPEN SOURCE

[code.care](#), an open source AI code review platform I am building. Launching soon.

---

## EDUCATION

M.Tech, Computer Science · Siddhartha Institute of Science and Technology, Puttur (2014 - 2016)

B.Tech, Computer Science and Engineering · Sri Venkatesa Perumal College of Engineering and Technology, Puttur (2010 - 2014)
